

Display beside the product they already trust.

Eight category seats inside signed Scale Health hubs. Not an open auction. Not a guaranteed impression buy. First story: thank-you after Scale buy or book — then in-experience display.

Live proof: [Tour the DR-HO hub](#)

Caption on every mock: Illustrative — not your receipt.

Eight seats

Pain relief / topicals • Recovery hardware • Nutrition • Sleep • Meal prep • Women's health • Men's health • Diagnostics / services

Hubs are the rooms. The seat is the exclusive shelf in those rooms.

Launching cohort

DR-HO'S • Kalaya • Jill Health • Jack Health • Integrity Fitness • Bird & Be • NutriProCan • Roll Recovery

Logos, not reach.

Demographics (MODELED — not measured census)

MODELED from Activity Clinic Hubs launching cohort (logos only). Never sell as measured census. No invented reach / CTR / LTV.

- End customer: 30–65, Canada / U.S., recovery / topical / sleep / nutrition / care shopper, often paramedical-insured, mid-to-upper household.
- Context: thank-you after buy or book, on a plan, or in-hub. Not a cold feed impression.

- Brand buyer: founder or brand manager already adjacent to those names.
- Birch is priced as a credit, not a CPM guarantee.

Formats (thank-you first)

1. **post_checkout / thank-you (after Scale buy)** — HERO · first placement story
2. **scheduled_service / post-book thank-you (after Scale book)** — HERO twin
3. recovery_plan · member_hub · motion_15s (in-experience next; Phase-1 stubs OK)

Mockup narrative order: 02 post-checkout first · 04 scheduled · 01 member hub · 03 size map. DR-HO / Kalaya = proof context only.

Shopify / hub activation (Phase-1)

- Shopify buy thank-you: Checkout UI Extension purchase.thank-you + customer-account.order-status → format post_checkout (same unit + attribution)
- Hub book thank-you: embed / snippet → format scheduled_service
- Same agnostic Birch unit — not a second product. No App Store install counts. Location kit ≠ Birch format keys.
- Starting sizes (mockup 03 **DRAFT**): ~656×280 splash · ~360×640 vertical — final IO wins.

Partner activation (same Birch unit)

Shopify-agnostic embed / snippet so Scale Clinic Hub / partner hubs can enable thank-you + in-experience display without custom one-offs. Scale Activation owns Shopify coordination. Care · commerce · display stay three contracts. [See Scale Health clinic hubs](#)

Rate card USD

- hold-190 · \$190 · 7-day look · refund or credit · does not consume a seat. Credit, not a flight.
- reserve-490 · \$490 · named category seat · 100% media credit · IO before flight · 12-month credit. Credit, not a flight.
- custom · Get a call back · multi-hub / exclusive / on-prem. Credit, not a flight.

[Get a call back](#)

Studio / clinic-hub path

Studios that already own a local audience can add a Scale Clinic Hub (store + booking) and then a Birch unit on that hub. Care, commerce, and display stay three separate contracts. [See Scale Health clinic hubs](#)

Legal floor

100% media credit. Delivery only under an approved IO that names the surface. Cash refund if no approved surface can be named within 60 days. Credit expires at 12 months. After IO: IAB cancel / makegood.

Aggregate reporting only. No PHI. No clinical pixels.

Seller: Silver Birch Growth Inc. · 777-2255B Queen St E, Toronto ON M4E 1G3 · [Email Randy](#).
